Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention: (1) an absorbent article comprising side panels with a removable portion, (2) an absorbent article comprising side panels with at least one removable portion and (3) an absorbent article comprising side panels with at least three removable portions.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1, 10 and 16 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

During a telephone conversation with Thomas Connelly on November 15, 2005 a provisional election was made with traverse to prosecute the invention of species (1), claims 1-9. Affirmation of this election must be made by applicant in replying to this Office action. Claims 10-20 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Information Disclosure Statement

The information disclosure statement (IDS) submitted on July 14, 2004 was filed after the mailing date of the Application on March 30, 2004. The submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

Claim Rejections - 35 USC § 102

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-4 are rejected under 35 U.S.C. 102(e) as being anticipated by Datta et al (U.S. Patent Application Publication No. 2004/0225271).

With respect to **Claim 1**: Datta teaches diaper 10 having a front panel 12, back panel 30 and crotch region 64 connecting front panel 12 and back panel 30. (¶¶ 0016,0030) Diaper 10 also has waist opening 66 and leg openings 68 and 70. (¶ 0032) Side panels are formed by the

Art Unit: 3761

engagement of tabs 38 and 40 with attachment member 24. (Fig. 2) (§ 0031) Datta also teaches absorbent assembly 50 disposed in crotch region 64.

(§ 0024) Datta teaches frangible portions 72 and 74 and 74 of tabs 38 and 40 that extend the width of the attachment member 24 from waist opening 66 to corresponding leg opening 68 or 70. (§ 0034)

With respect to **Claims 2-4**: Datta teaches that frangible sections 72 and 74 are arcuate perforation lines (§§ 0033,0034)

Allowable Subject Matter

Claims 5-9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. A thorough search of the prior art of record has not yielded a reference or combination of references that teach or fairly suggest a disposable absorbent article having at least one removable portion joined to the side panel by a tear line that extends from a front region adjacent a leg opening and extends to a back region of said article terminating adjacent the same leg opening.
